2012 Envirothon

The 2012 NJ Envirothon competition will be held on May 5, 2012 at Camp Sacajawea Girl Scout Camp, Farmingdale, NJ.

The Environmental Issue for the 2012 Envirothon is: **Nonpoint Source Pollution/ Low Impact Development.**

Information about the NJ Envirothon is available at your local Soil Conservation District office, online at: www.njenvirothon.org or by calling Rich Belcher, Envirothon Coordinator, at 609.292.5540.

2011 New Jersey Envirothon Winners - MATES

By Graelyn Brashear* of the Lacey Patch (Issue: May 17, 2011)

For the second year running, students from Stafford's Marine Academy of Technology and Environmental Sciences (MATES) will represent New Jersey at an environmental competition that draws students from across the continent. James Geddis of Jackson, Alex Hascha of Brick, Kelsey Lardiere of Manahawkin, Michelle Predi of Barnegat Light and Ryan Sullivan of Lacey led MATES to a second victory in as many years at the New Jersey Envirothon, an annual competition where students answer questions testing their knowledge in forestry, soils, aquatics, wildlife management and current environmental issues. Now they've got their eye on a top ranking at the Canon Envirothon, which takes place in New Brunswick, Canada later this summer.

The Canon Envirothon is the largest environmental education competition in North America. Hundreds of thousands of students from the U.S. and Canada participate each year in competitions in their respective states and provinces, with one winning team from each moving on to a national-level competition that pits students from all corners of the continent against each other in a battle of science skills and knowledge.

The MATES students worked all year to prep for the chance to hold onto their state title and get another shot at nationals, said advisor Adam Sprague, a teacher at the academy.

The breadth of knowledge the students have to master and retain to succeed is vast, Sprague said. The competition requires them to do everything from identifying trees by species and calculating the board feet they could supply to hopping down in a pit to classify layers of soil.

Even the returning champions needed to study up. "It's a matter of keeping them on

edge and challenging them to push themselves," Sprague said.

Two MATES teams traveled to Mahwah's Camp Glen Gray for the May 7 event, said Sprague, camping out and spending a full, tense day taking written and field tests and offering presentations on this year's current events topic, freshwater estuaries – a lucky draw for students from a marine sciences school.

In 2010, spurred by a very close second-place finish the year before, the school's older and more experienced team won the state competition by a big margin. This time around was another story. "We didn't win any sections like we usually do," said Lacey senior Ryan Sullivan, 17, a three-year Envirothon veteran. Normally, MATES' more experienced team swept a few categories, he said. This year, they were strong across the board, but didn't shine in any particular section of study.

As it turned out, the well-rounded approach was to their advantage, but there was some uncertainty before officials read out the scores and announced them the winners, said Sprague. "They were confident all year," he said. "That was the first time I saw doubt in their faces."

For the hard-earned win, each of the MATES team members received \$1,000 scholarships from the New Jersey Association of Conservation Districts, \$2,000 scholarships from Richard Stockton State College and \$1,000 scholarships from Applied and Health Sciences at Kean University, said Lynn Richmond, spokeswoman for the NJ Department of Agriculture, an event sponsor.

Sponsor Spotlight on Wakefern Food Corporation

Wakefern Food Corporation and ShopRite stores share a long-standing commitment to protect the environment and conserve natural resources. For the past 30 years, ShopRite supermarkets have worked to implement policies, procedures and initiatives to reduce their environmental impact. Examples of “green” store improvements include the installation of solar panels at the ShopRites of Wharton and Garwood, NJ; extensive in-store recycling and composting efforts; and using super-efficient refrigeration systems and energy saving lighting systems in many ShopRite stores.

Wakefern’s commitment starts in its stores and continues in its neighborhoods and communities. This is important for the earth and important to customers. For many years, Wakefern has donated money, materials and time to local environmental projects such as liter abatement, coastal clean-ups, tree plantings, and threatened and endangered wildlife preservation efforts.

The Wakefern — Envirothon partnership is a natural connection.

“Wakefern’s sponsorship helps the NJ Envirothon program to reach its goal: to encourage students to become better informed, active participants in natural resource management and problem solving,” explained Richard Belcher, NJ Envirothon Coordinator.

In addition to Wakefern’s financial support for the past six years, Suzanne Forbes, Environmental Affairs Administrator at Wakefern Food Corporation, is excited to volunteer her own time as a judge for the Team Presentation portion of the event this spring. She explained, “Wakefern has always taken great pride in protecting our environment and embracing sustainable business practices. The New Jersey Envirothon competition provides the next generation’s environmental leaders with valuable hands-on experience as they work together to solve local environmental issues.”

2012 Envirothon Set for Camp Sacajawea in Monmouth County

By Karen Rowe, Freehold Soil Conservation District

The 19th annual NJ Envirothon, a natural resources problem-solving competition for high school students, will be held on May 5, 2012 at Camp Sacajawea Girl Scout Camp in Farmingdale, Monmouth County.

Camp Sacajawea, which is owned by the Girl Scouts of the Jersey Shore Council, is located on more than 140 wooded acres featuring a lakeside cabin nestled at the end of a private, stream-fed lake. A low-ropes challenge course, two interactive hiking trails (trees & fitness), archery, zip-line, climbing wall, swimming pool and boating facilities are available in season.

Envirothon teams can choose to arrive on Friday night and camp using their own tents or the provided yurts, cabins or tent platforms. All campsites have drinking water and facilities nearby.

Freehold Soil Conservation District is pleased to host the 2012 NJ Envirothon.

2011 NJ Envirothon Held at Camp Glen Gray

By Angelo Caruso, Bergen Soil Conservation District Manager

The 18th annual NJ Envirothon was held in the rustic wilderness known as Camp Glen Gray located in the Ramapo Mountains of Mahwah in Bergen County. The 750 acres of woods and four acres of lake were the perfect setting for 38 teams of high school students to experience this unique combination of camping and environmental competition.

As the host district, Bergen SCD had its hands full helping coordinate such an event in the often rough terrain. Tables, chairs, tents, food, refreshments, and camping gear had to be lugged up steep, rocky trails and across wooden footbridges.

Volunteers from the NJ Department of Agriculture State Soil Conservation Committee, NJ Soil Conservation Districts, NJ Search & Rescue Squad, NJ Department of Environmental Protection, USDA Natural Resources Conservation Service, Rutgers University, Bergen County Department of Parks and the Friends of Camp Glen Gray all worked together to make it happen.

Teams arriving on Friday were assigned camping areas and were warned not to keep food in their tents to avoid close encounters with black bears and other critters. Some teams chose to stay in one of the many cabins on site and dinner was served at the Old Dining Hall Lodge to all campers. A campfire, along with all the fixing for s'mores attracted many students. Some took the rare opportunity to view the night sky, without the distraction of city lights, through a telescope set up by Marc Rogoff, a NJDEP employee and amateur astronomer.

MATES (continued from page 1)

Now, said Sullivan, the focus is on making a strong showing at the national competition, which takes place July 24 to 29 at Mount Allison University in New Brunswick, Canada.

At nationals last year, he said, "we were really like a small fish in a big pond. We didn't know what we were getting into, and it showed in our test scores. Hopefully we'll better prepare ourselves and improve this year."

That means brushing up on the species and the ecology of Canada's Maritimes, said Sullivan. But preparing for the competition is hardly a chore, he said. He and the others care a lot about the subjects they're studying, and some plan to use their knowledge they've gained in future careers. Sullivan, who excels at aquatics, wants to go into hydrogeology in college.

And when the science-minded students are studying

Opening ceremonies took place in the amphitheater overlooking Lake Vreeland. Students and advisors were welcomed by local, county and state dignitaries including Maura DeNicola, Bergen County Freeholder.

Throughout the day students worked their way through a series of timed stations that tested their practical environmental knowledge and their team presentation skills. By late afternoon teams assembled to await the final scores, with DJ entertainment and refreshments.

The winners of the 2011 event were: 1st — Marine Academy of Technology & Environmental Science Team #1 (pictured below), 2nd — Four Guys & A Princess (a first time participating team that received a standing ovation from their peers), and 3rd — Princeton High School Team #1.

Congratulations to all the teams for their outstanding sportsmanship and courtesy (there were no disqualifications and the camp was left in pristine condition)!

We wish to thank the County of Bergen and the Friends of Camp Glen Gray for their outstanding cooperation and the use of their facility. We also want to thank all the volunteers who worked so hard to make this event a success.

and competing, they're truly among their peers.

At the competition, said Sullivan, "there are familiar faces everywhere. They're people that share the same interests; people who really care."

Note: MATES placed 24th out of 54 at the Canon Envirothon.
